INTRODUCTION

This book, which I hope will become an annual publication, highlights the many accomplishments of SUNY Fredonia faculty from June 2009 through May 2011. The information was gathered from the 2009-2010 annual reports submitted at the end of the academic year and through the Activity Insight reports in Digital Measures in May 2011. Every attempt was made to be accurate and complete in the listings and to cite work according to the citation and document styles of the disciplines they represent. The citations include only work *completed* in the time period; forthcoming work will be featured in next year's publication. Presentations given on campus—such as those in classes and meetings—are not included except for research colloquia, convocations, or similar presentations. Accomplishments of part-time faculty are included if the department provided this information; graduate students' accomplishments are not included here unless their work was a collaborative publication or presentation with faculty members. This year's document is limited, in that it does not reflect the entire picture of faculty contributions. I am eager to include in next year's report, some information about faculty members' teaching and service: efforts and accomplishments in these areas are significant but more difficult to quantify, and I hope for your suggestions about how best to include such information in next year's report.

Even a glance at these pages will show the many ways—across the university—that faculty are contributing to the knowledge in their fields and teaching with creativity, commitment, and innovation. I hope you'll discover new topics to discuss with your colleagues—perhaps even find people with whom you might collaborate! There is much we can learn from one another. Some of the accomplishments listed here are the result of faculty-student collaborations. Asterisks beside co-authors' names indicates that they are SUNY Fredonia students, where known. Because the annual Student Research and Creativity Exposition booklets already list the faculty mentors for almost 200 projects each year, the important collaborations with students in the Expo are not duplicated here. Those publications are available on the website of the Office of Student Creative Activity and Research: <http://www.fredonia.edu/oscar/>.

Although SUNY Fredonia is a regional, public university, reading through these pages will show all the places—far beyond Western New York—where faculty have engaged in research, performed, exhibited, or presented their work over the past two years. It is an impressive reach that demonstrates the reputation that SUNY Fredonia faculty members have earned across the country and around the world. This engagement in the disciplines is one of the strengths of our academic programs and our institution.

Thank you to SUNY Fredonia student Deanna Schmittendorf, who assisted in preparing this report; to Patty Herkey, who designed the cover; to Deans Russell Boisjoly, Christine Givner, and John Kijinski; and to Cheryl Budniewski, Tracy Horth, Pam Fabritius, Julie Sticek, and many departmental chairs and secretaries who were instrumental in its publication. Finally—and importantly—many thanks to the dedicated, talented SUNY Fredonia faculty whose work is reflected here. Your engagement in your fields of study, your continued scholarship and creative work, and your commitment to student learning are at the center of our academic mission.

Vice President for Academic Affairs
