

Hiding the Gradebook

If you would like to hide all of your grades in the gradebook, two settings will need to be changed in ANGEL.

1. Remove the grade nugget from your Course tab
 - a. On the Course tab under the title of the course, click the Edit Page link
 - b. On the Grade Nugget, click the x to remove it, then press save

2. Viewing through the Report tab.

Hiding the Reports tab will prevent the students from viewing grades, but leave it available for the editor.

 - a. To turn the Report tab off, go to the Manage tab.
 - b. Click on Tab Settings from the Course Settings nugget
 - c. Change the Report drop down menu to Course Editor.
 - d. While it says Course Editor only the instructor will be able to view the gradebook.

When it is time for the students to view the grades, change the option on the report tab back to Everyone. Also, place the Grade nugget back on the course homepage.
