

Embedding YouTube Links

Copying and pasting YouTube links into ANGEL no longer works. YouTube links need to be embedded into ANGEL. There are two ways to embed YouTube links

To Embed a YouTube Video in ANGEL:

1. Locate the video on YouTube
2. Press the Share button under the video
3. Press the Embed button that appears
4. Copy the code that appears under the embed button
5. In ANGEL go to the Lesson tab and click the Add Content link
6. Select Page
7. Add a title
8. In the Page Text field click the Source button
9. The source button is the last button on the second toolbar and looks like a piece of paper with a yellow arrow
10. Paste the embed code into the Page Text field
11. Press Save

Or

1. On the Lessons tab, click the Add Content link
2. Click on the Page link
3. Add a title
4. On the Page Text toolbar click the Insert Rich Media button. This button has a G on it
5. In the Find field, search for the video
6. Press the Embed button below the video you would like to display
