Bowl-a-Fact

In bowling, the object is knock down ten pins with one or two throws of a bowling ball. Knocking down all ten in one throw is called a strike. Knocking down all ten pins in two throws is called a spare. The game of Bowl-a-Fact is similar to bowling except instead of throwing a bowling ball, one tosses three number cubes (numbered from 1 through 6) and makes as many numbers from 1 to 10 as possible by adding, subtracting, multiplying or dividing the numbers showing on the number cubes. Each number showing on a number cube must be used exactly once on one side of an equation. For each number that can be obtained, the corresponding circle is shaded. (This indicates a pin knocked down).

What pins can you knock down with this toss? 1, 2, and 4.

Did you get a strike? _____
