Proposed semester:_______________________ Year________________________

Candidate Name:       ID#
Address:
Phone
Today’s Date: 6/29/2004

* Research Projects may involve the use of human subjects. A Research Projects involving the use of human subjects MUST have the approval of the Human Subjects Committee.

Please complete the following information on a separate sheet, in triplicate:

I. Project Title (The title should summarize the main idea of the project)
II. Introduction (What is the point of the study or project, what are the theoretical implicatons of the study or project, how does the study or project relate to previous work in the area, cite previous work or research)
III. Purpose (define the variables involved, state your hypothesis, discuss the need for this study or project, what do you hope to accomplish)
IV. Procedure/End Product (If completing a study, provide an appropriate methods section by referring to the American Psychological Association's Publication manual; if developing a curriculum project, what learning, developmental and curriculum theory is the project based on, what type of curriculum do you expect to develop, what "type" of student will this curriculum be appropriate for, how will you determine its age appropriateness)

If working with people or records, did you receive human subjects' approval?
Yes  (If no, project cannot be approved until completed)
