Physics Resource Group

Based on the requests of the physics teachers present at the Science Educators Day at SUNY Fredonia, a Physics Resource Group is being formed. The inaugural meeting of this group will be Saturday, March 22. The meeting will occur in the Library at Fredonia High School. Based on the suggestings from the group we will be focusing on a number of topics: these include:

- Discussion of Part D for Physics
- CASTLE approach to teaching electricity
- Share-a-Thon on teaching electricity (Please bring your favorite demo or activity!!)
- Technology for the Physics Classroom (websites, interfacing, etc.)
- Your ideas for our next times together.

There is no fee for this day, but it would be a help if we had some idea of how many people were coming so we don’t over buy food for that morning. So please just send the slip back to Dr. Jabot by the date requested. Please join us on Saturday, March 22 as we kick off this exciting endeavor.

Saturday, March 22, 2003
9:00 AM - 12:00 PM
High School Library - Fredonia High School

Please return this slip to: Dr. Michael Jabot, Director, Institute for Research in Science Teaching, E272 Thompson Hall, SUNY Fredonia no later than Thursday, March 20 so we can plan for materials. If you have any questions please call Dr. Jabot at 673.3639.
