

State University of New York at Fredonia

Smoking Policy

Since 1995, smoking was prohibited in every campus building with the exception of certain designated residence hall bedrooms. Effective July 1, 2004, in response to a state mandate, this loophole was closed. Smoking is no longer allowed in residence hall bedrooms, and every building and university vehicle has been designated smoke-free.

Smoking on the Fredonia campus is only permitted outside of a campus building or campus vehicle.

President Dennis L. Hefner
