*This course will discuss TD Snap, with limited to no information about like products or services. TD Snap is a communication platform, with user-friendly editing and customization tools, offering AAC page sets for various age groups and abilities. Participants will review communication features to support flexible, efficient communication for AAC users and resources to aid TD Snap implementation in different settings. Additionally, participants will review timesaving, easy-to-use, and free resources that address AAC device funding challenges. Additionally, participants will learn about tools and resources to support device funding, initial assessment and daily communication with AAC. The aim of this session is to show how approachable AAC can be with various supports in place.*

## Learning Outcomes: Participants will be able to:

1. Utilize TD Snap's communication tools and customization options to enhance communication success
2. Identify resources and supports for AAC assessment, trialing, and funding
3. Describe the requirements for an AAC device report and benefits of using E-Funding Portal
