

Intern WALL OF FAME

Jessica Martinen (Psychology, Senior)
Clinical Psychology
WCA Hospital

My internship experience was excellent. I learned an array of skills related to clinical psychology, and got to have one on one interaction with patients. This internship showed me ways that the knowledge that I learned in my classes is applied in a real world setting. I strongly recommend that anyone who is considering doing an internship to pursue it. It's an opportunity you cannot afford to miss out on! Take advantage of the Career Development Office.
