

# Intern WALL OF FAME

**Nicholas Gunner (TV/Film, Junior)**

**Atmotag  
SUNY Fredonia**

Atmotag has given me the opportunity to explore many of my skills including web design, multimedia production, and promotion. On top of that, I was able to pursue my ideas and see how successful or not successful they were.

I would love nothing more than to work as a sole-proprietor, building products like Atmotag. This internship has let me test the waters of self-employment to a certain extent. I would rate this internship experience as invaluable. Building Atmotag was the only route for gaining the experience I have now. I would highly recommend pursuing individualized internships to people who are ambitious about their own ideas and projects. Academics, though important, only go so far. Hands on experience is not only great for a resume but for a student's confidence in his/her abilities. For more information about Atmotag, check out [www.atmotag.com](http://www.atmotag.com) or [www.atmotag.com/front/about](http://www.atmotag.com/front/about)

The Career Development Office is an invaluable resource for students. They make internship/job hunting easy!
